

Faiez Shaikh

Frontend Developer

Delhi, India • mohdfaiez2004@gmail.com • GitHub: github.com/mohdfaiez2004-max • LinkedIn: linkedin.com/in/faiez-shaikh-b95553424/

PROFILE

Frontend developer focused on building responsive, interactive web experiences with React, JavaScript, and Tailwind CSS. Experienced in API integration, client-side state management, deployment, and AI-powered web applications. Enjoys turning product ideas into polished, usable interfaces.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React, Tailwind CSS, Responsive Design

React: React Router, Context API, Hooks, Component-based UI

APIs & AI: REST APIs, Gemini API, AI Integration

Tools: Git, GitHub, Vercel, localStorage

PROJECTS

Pixflow

AI-powered web application that transforms user ideas into modern UI designs and code. Built with React and Tailwind CSS, with Gemini API integration, loading/error states, code copying, and deployed production builds.

Tech: React • Tailwind CSS • Gemini API • Vercel

Forcart

Modern e-commerce frontend featuring product browsing, React Router navigation, Context API state management, and persistent cart data with localStorage for a seamless shopping experience.

Tech: React • React Router • Context API • localStorage • Vercel

Price-Crafter

Web application focused on creating clean, attractive, and customizable price-tag designs, making professional-looking product pricing visuals quick and simple to create.

Tech: React • Tailwind CSS • Web APIs

DEPLOYMENT & DEVELOPMENT

Built and deployed multiple React applications to Vercel using GitHub-based workflows. Comfortable debugging frontend issues, integrating external APIs, managing environment variables, and building responsive interfaces for desktop and mobile.

EDUCATION

Bachelor of Arts (B.A.) — University of Delhi (DU SOL)

Currently pursuing • Delhi, India
